**Liu Wing Ki, Claudia**

Senior Vice Principal (Academic  
Affairs) and Head of International  
Curriculum

We believe that there is no limit to what our students can achieve and every student has the power to realise their potential and aspirations. We offer an international curriculum (GCEAL) with unique learning opportunities to fuel students' ambition and nurture 21st century learning skills alongside academic pursuit.

# GCE AL

## Global Recognition

GCE A-level is an internationally recognised qualification, adopted in over 125 countries, and is accepted as proof of academic ability for entry to universities worldwide. The syllabuses develop a deep understanding of subject knowledge and

independent thinking skills. All the GCEAL subjects offered are administered by either University of Cambridge International Examinations (CIE) or London Examinations (Edexcel). The GCEAL is often characterised as a university preparatory course, and most students who choose GCEAL have an intention of continuing their higher education overseas. Nonetheless, our GCEAL students have an equal advantage in applying to local universities through non-JUPAS admission.

## Diverse Learning Experiences

We provide abundant learning opportunities beyond the classroom, both locally and globally, to enhance students' learning. A signature event called Uni Tour, which allows students to make their way to the top universities in UK. The process of figuring out which university best fits their needs is an overwhelming but critical task. Uni Tour transforms this experience into an enriching and enjoyable summer adventure, in which students join campus tours, meet with admissions representatives and collect information about various universities, faculties and study programmes.

## Admission Coaching

We aim to help students define their educational goals, make informed decisions and search a university programme that best fits their individual needs. We guide students to reflect on their learning, refine priorities, maximize options and present the best version of themselves for admission to the top-ranking universities.

# Curriculum

We offer a comprehensive curriculum supported by academic coaching to equip students for admission to the world's top universities. Other than the core subjects and other learning experiences, students normally study 3 to 4 A-level subjects in order to meet the admission requirements of universities.

## GCE A-LEVEL

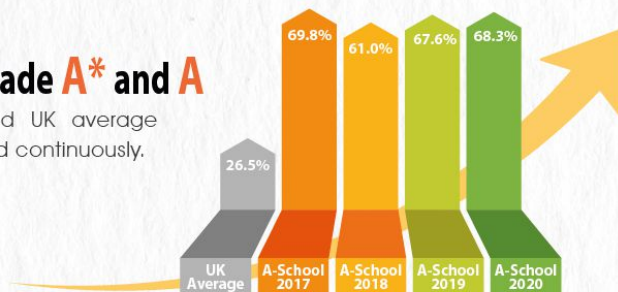

# Our Academic Achievements

## IGCSE

### No. of entries at grade A\* and A

Our students outperformed UK average candidates significantly and continuously.

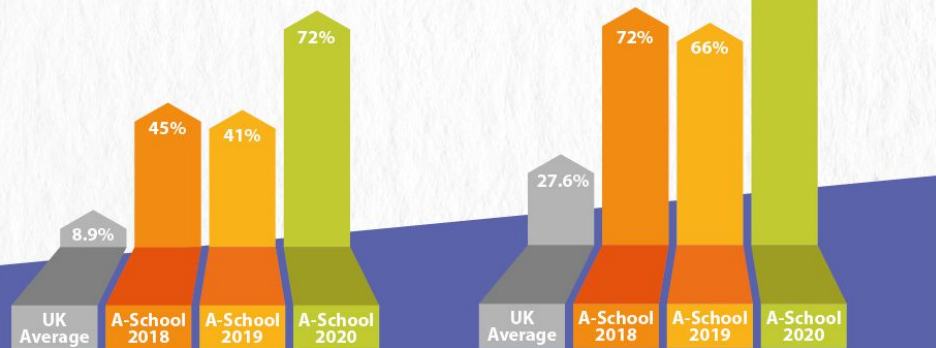

## GCEAL

### No. of entries at grade A\* and A

Our graduates continuously achieved remarkable results at the GCEAL exams which are significantly higher than global averages, leading them to secure admission to the world's top universities.

### No. of entries at grade A\*

### No. of entries at grade A or above

Our AL programme starts in 2016. The overall further study rate reaches 100%. Among the graduates, over 75% received offers from tertiary institutions within top 100 QS World University Rankings. Graduates have been admitted into undergraduate or postgraduate studies at the world's famous universities, such as University of Oxford, Imperial College of London, University of Glasgow, University of Edinburgh, University College of London, University of Manchester, Goldsmiths College University of London, King's College London, Durham University, University of Warwick, University of California, Davis, University of New South Wales, Australian National University, University of Western Australia, Simon Fraser University (Canada), National University of Singapore, the University of Hong Kong, the Hong Kong University of Science and Technology and the Chinese University of Hong Kong, etc.

# Outstanding Alumni

**Ho Tsz Chun**

Department of Mathematics  
University of Oxford, UK  
Awardee of Hong Kong Scholarship for Excellence Scheme

*"This programme really benefits me by developing my interest and learning ability in maths. With the help, encouragement and support from teachers, I eventually obtain a place at the University of Oxford and a scholarship."*

**Yuen Tin Long**

Department of Biotechnology  
Imperial College London, UK  
Awardee of Hong Kong Scholarship for Excellence Scheme

*"By reviewing my accomplishments today, I have to thank A-School in which I have studied for 12 years. Undoubtedly, A-School has set the stage for me to expand my academic horizons, and also equipped me with a critical mindset and motivation for learning, making me capable of taking on new challenges and seeing things with a wider perspective."*

**Yuen Lok Man**

Department of Life Sciences  
Imperial College London, UK  
Awardee of Hong Kong Scholarship for Excellence Scheme

*"Time flies! Not so long ago, I was still a Grade 1 student, excited at the school life ahead. 12 years have passed, and I am currently a Biologist in Imperial College London. Looking back, it has been a really big transition in myself – I started as an introvert, but now I am one of the most outgoing students in my class. I could never thank A-School enough for developing these changes."*

**Lee Tak Yin Quinton**

Experimental Psychology Department  
University of Oxford, UK  
Awardee of Hong Kong Scholarship for Excellence Scheme

*"The school, like many sensible schools, had left us mostly with our own devices to figure out the A-levels. I can see with this methodology, people who are used to forcing in knowledge much like the foie gras ducks might find this novel and challenging. Some teachers who poured their hearts into fostering new ideas, critical thinking – some I'd admit did so in eccentric yet creative ways – and ensuring the well-being of us all."*

**Lai Yu Chun**

School of Mathematics  
University of Edinburgh, UK  
Awardee of Hong Kong Scholarship for Excellence Scheme

*"A-School always gives me an impression of innovation and open-mindedness, which has allowed me to have all these valuable experiences. I really appreciated the fact that my class and subject teachers were keeping in close touch with me and always helped me with my problems."*

**Chang Chun Hei**

Faculty of Computer Science  
University of Oxford, UK

**Ho Shing Him**

The Hong Kong University of Science and Technology

HKBUAS is the first and only local school to develop a partnership with the University of Missouri-Kansas City (UMKC) in offering a Dual Credit Programme for our students who are interested in pursuing STEM related programmes in the future. Students enrolled in the dual credit courses can earn college credits at A-School and then transfer the earned credits to most public and private colleges and universities in the US.

Ontario High School Diploma is the province's official high school diploma offered by Ontario Minister of Education, Canada. It is well recognised by universities around the world for direct admission.

HKBUAS has partnered with a Virtual High School in Canada, which is authorised to grant credits for the Ontario Secondary School Diploma. Students follow the dual curriculum in A-School from Grades 9 to 12 with a self-financed online top-up programme with the Virtual High School in Grades 11 and 12.

## UMKC

- 1,122 faculty members
- 95% hold highest degrees in their fields
- 2 Pulitzer Prize winners
- 8 winners of Guggenheim Fellowships

# Waseda University

## High School Recommendation Admission Scheme

WASEDA University

HKBUAS is a pioneer to enter partnership with the acclaimed, long-established Waseda University (WU) in Japan to launch the High School Recommendation Admission Scheme in local secondary schools. One student will be nominated to the university's School of International Liberal Studies in each school year since 2018 with scholarship to support their learning overseas. From 2021, the scheme will be conferred on two eligible candidates and other students from our school interested in applying for the designated programme will be given bonus points by the university in recognition of the outstanding performance of our graduates in WU.

Founded in 1882, WU is one of the most prestigious private universities in Japan, which consistently positioned among the top institutions in Japan and CM university rankings. WU has been a cradle of many notable public figures, including Prime Ministers, literary giants and CEOs of international enterprises.

Make the most of  
your potential  
at HKBUAS

## Learning Experiences

We ensure the breadth and diversity of learning opportunities for every student and offer a network of partnerships and programmes that develop a global perspective.

## Why HKBUAS?

We aim to provide quality education based on Christian heritage and concern for others. Students will explore their potential in an environment where East meets West, giving them the best of both cultures. We mentor our students, fostering their personal growth to encourage initiative, positive attitudes, individuality and creativity, providing a basis for lifelong learning.

## Academics

We provide flexible curricula that empower you to pursue your dreams and unleash your potential to the fullest.

*Passionate to Learn, with Confidence*      *Determined to Succeed, with Vision*
